

# ETERNITY

Often one hears talks  
Rightly or wrongly  
About eternity  
But those  
Who talk about it  
Have an idea  
Or vague idea  
Of what one talks about  
When one talks  
About eternity  
Each action  
Is the fruit of a Creation  
Therefore one can consider  
Reasonably  
That it is a beginning  
And if there is a beginning  
There is a continuation  
And in the continuation  
There is an ending  
That must be  
Because the Human Being  
Is a matter  
Now it is not possible to challenge  
That a matter  
Any  
That concerns the Human  
Being  
And that also composes him  
Has been taken away  
By something  
That exists  
After all it is always  
Just a matter  
Of any kind  
Or substance  
That through  
A certain period

Of material  
Time  
It degrades  
It decomposes  
And returns  
If left to itself  
To the original matter  
What it has been  
A starting point  
And has provoked  
An arrival point  
Therefore a matter  
Of any kind  
Has a beginning  
And an ending  
On consequence  
One cannot talk  
About Eternity  
No matter  
Is eternal  
Since through  
Time  
Even the extremely resistant  
Matter  
Degrades  
Decomposes  
And returns  
To the original matter  
Meaning it has no time  
Because time  
Has given life  
To this matter  
Nothing else  
Notwithstanding  
Various attempts  
To preserve  
A matter  
Even if prepared  
In time

It degrades  
It decomposes  
And disappears  
In the time  
The time  
That is in Space  
That the Human Being  
Does not know  
And believes to know  
Or to create  
Something similar  
It is always well far away  
From reality  
Therefore  
In any case  
One cannot talk  
About Eternity  
That may concerns  
A Matter  
The talk  
If so we wish to call it  
Changes if we take  
Under examination  
Another kind of Matter  
That we can define  
Non-matter  
Obviously starting  
A talk  
Founded on a  
Supposition  
That in fact  
May not be  
It always falls within  
The origin  
Of this talking  
About Eternity  
The Matter  
That is not matter  
But it is after all always

A matter  
Because this component  
Exists  
That is part  
Of the knowledge  
That the human Being  
Wants to have  
At disposition  
To understand  
This matter  
Non-matter  
That sometimes  
Is defined  
By other terms  
Spirit  
Soul  
That each human Being  
Feels to have  
Inside oneself  
Even if is not able  
To define  
In human  
Terms  
The Human Being  
Finds himself facing  
Something  
That feels  
Exists  
Has always existed  
And will always exist  
Is able then  
To quantify  
And translate  
In matter  
The thought  
That is not a matter  
But is capable  
And can create  
A matter

Non-matter  
That is an integral part  
Of the Being that lives  
In a matter  
Knowing very well  
That does not need  
Of interpreters  
To know and understand  
What is  
The matter non-matter  
It is evident  
That if he believes  
What composes him  
As  
Matter and non-matter  
Is part  
Of a Whole  
That has been created  
To become  
A matter  
But it is not matter  
But it composes  
The Being  
That is part of the Creation  
That has been created  
Hence does not have an ending  
But has a beginning  
It is up to the Human Being  
That is a matter  
That does not have only matter  
To be able to understand  
The meaning  
The true one  
Not altered  
By the Human Being  
In a way  
To gradually  
Get closer  
To the true meaning

Of Eternity  
Keeping in mind  
That first he must  
Through the Faith  
A profound Faith  
That still is not  
Sufficiently  
Developed  
And believe completely  
That beyond his matter  
There is something that seems  
Matter  
But it is not  
It is the Soul and the Spirit  
That composes his Being  
Why two words  
Instead of One  
The Eternity is only one.
