

# Spirituality

There is a lot of talk  
There is too much talk  
About Spirituality  
Listening to the affirmations  
Of some personages  
Who define themselves  
Spiritual  
Highly spiritual  
And of their faithful followers  
Unanimously confirming  
This halo  
Because at this point  
It could even appear  
A halo  
That one is not able to understand  
If it is real or virtual  
One might think  
That the world is in the hands  
Of these lofty people  
Who are so altruists  
That we do not even realize it  
And we are the selfish ones  
Meaning the mass  
That does not understand  
That all these personages  
All in general  
In all fields  
No one excluded  
Dedicate their life  
Day by day  
To the well being  
Of the masses  
For the well being  
Of the just and honest beings  
Whom by being so by nature

They do not understand well  
In which way they have to be  
Just Honest Humble  
Because them  
The just honest humble  
Of the base  
Are spontaneously so  
Humanly  
While many leaders  
Use these capacities  
In a different way  
And for other purposes  
That up to them  
Is for the well being of the humanity  
As being them spiritual  
Meaning above everybody  
Can better indicate  
To the base how to live  
In the society  
In the society that they  
Would like to create and administrate  
Virtually like in the past centuries  
Where there was no alternative  
Submit or perish  
Then it was easier  
For these leaders  
To manage with absolute power  
They justified  
Themselves  
Using the image they presented  
To the masses forced to the ignorance  
And theirs was the truth  
The only truth  
Because they were spiritual  
Very spiritual  
Today in the computers era  
The masses have realized

That there are realities and truths  
Totally different  
From the original ones  
Meaning **THE VIRTUAL** reality and truth  
Which look real  
But they are not  
And in some cases  
The manifestation is perfect  
All seems real  
While it is all false  
The new generations  
Which now use the computers  
In all fields  
Know well the real from the virtual  
And start wondering  
In the past was it really all real?  
Have they always tried to give to understand?  
That all what has been said and written.  
Was and is the truth the reality?  
These “personages”  
Should start  
Today we can still believe  
To fool into believing anything  
These ignorant masses  
Capable then to believe everything  
Unfortunately for “them”  
Luckily for the others  
For the ignorant masses  
Which are not as such anymore  
Today the new generations  
Believe and want to believe  
Some concrete things  
Clear and true  
It is not possible anymore to send out smoke in the eyes  
In the eyes of honest and humble people  
The example must be real and visible  
From who have the intention still

To bring spiritual words  
As per millenary examples  
Which are not possible to distort  
Or modify for personal use  
Of caste or category  
These times are over  
The authoritarian and persecutory times  
During which only one law was in force  
The law of the strongest and ferocious  
The law of the unconditioned violence  
In particular towards the most weak  
Towards those who could not defend themselves  
All the big "political empires and not"  
Have miserably collapsed  
The masses have cleaned up  
Destroying these monuments to the terror  
So many big "personages"  
Have fallen in the dust  
Have disappeared  
There are still in some place  
Some hypocritical monuments  
Which regards "personages" despicable  
Of having monuments in their memory  
They are monuments erected for criminals  
Even if they are of stone or marble  
They were dust in the time  
Now the time has come  
For whom has the ring of fire  
To have this stone and this marble  
Reverted to the dust  
For justice of this and of the other World  
There was a maxim in the past  
That said "woe to the vanquished"  
Today one could safely say  
"Woe to the false victors"  
If they have been they will not be anymore  
Not even in the memory

As an eternal admonition  
For the future people  
Because now it is necessary to look to the future  
For a greater and effective spirituality  
That must come from the heart  
Believing in something  
Must not be a fashion  
As it is happening today around the world  
For exhibitionism many are converted  
To some oriental religion  
Only because it is very intellectual  
In particular among the people  
Well-known in the show business  
In the fashion and jet set  
It is all hypocrisy  
It is all falsity  
If they have not been able  
And they clearly show it  
To follow the teachings  
**Of Jesus Christ**  
Outside of what  
Can be a lesson  
Right or wrong  
Since there could be even this danger  
The handed down words  
From the apostles  
Do not need many explanations  
They are very clear  
Extremely clear  
Surely it is not always easy to follow them  
Very often they are openly in contrast  
With one's own way of living  
But these words are always right  
Certainly not for who should bring them  
Or receive them  
It is here that the creed begins  
The Spirituality

When one is able  
To follow with joy  
Some teachings  
Which lead to some sacrifices  
Which are after all renouncements  
Only for negative actions  
Certainly not for positive ones  
There is a fallacy  
Unfortunately very rooted  
By which one think  
That a spiritual person  
Is the one who assists to the mass  
Every day  
Who goes to confession very often  
And receives the communion  
If not every day  
Almost every day  
Attends all religious ceremonies  
In the morning and also in the evening  
Recites some prayers every day  
And what is fundamental  
Makes sure to be seen while reciting these prayers  
Obviously  
Because praying where nobody sees  
It is not rewarding  
For the person  
It is always necessary for these people  
Very religious  
To show that they are extremely religious  
In the big celebrations  
Of religious nature  
They always take the trouble  
To get the seats  
If not in the first row  
In the very first ones  
And there is a very simple reason  
There is always the television

Or some photographers  
And having a close-up taken  
Is very rewarding  
But above all very convenient  
Under every aspect  
There are then embarrassing  
Situations  
For these people  
Because not all goes the way it was planned  
A telephoto lens shot  
Not noticed on time  
Could show this person  
With a facial expression  
Not precisely religious  
But commonly distressed  
Of this loss of time  
As it is evident  
That this person  
Does not assist for believing  
But only for convenience  
It is quite easy  
In some videos  
Which have not been cleaned up on time  
Many of these expressions  
Which are not of joy  
And which concern important people  
But hardly this would be noticed  
It is always preferable to ignore  
This inconvenient  
As they are extremely  
Spiritual people  
And certainly it is not possible to doubt  
Of their unshakeable faith  
But besides these digressions  
There is always Someone who is not visible  
But who sees everything very well  
And what is more important

Sees also inside these people  
So spiritual  
But in this world  
And in particular  
In these environments  
It is very important the scenario  
The signed theatricality  
And directed by artists  
Apparently very religious  
Who let intend they are giving  
Their assistance for free  
To these moving acts  
Meaning they let only intend  
That it should be  
An act of faith  
The difficult part is making sure  
If effectively it is so  
Very often it is notify just later on  
Or one gets to know  
That it was not really  
Totally disinterested  
This service  
Or this participation  
In the ancient times  
Many centuries ago  
Few denarii have been enough  
To betray a faith  
Today obviously they would not be enough  
The denarii should be  
At least some hundreds of millions  
Unfortunately in the contemporary world  
Too many times the faith  
Is synonymous of considerable earnings  
Accurately masked  
Under colored marquees  
Which interest many  
Spiritual people

Who live in this environment  
Or in the immediate vicinity  
They are very industrious and resourceful  
In zealously doing everything in one's power  
To propagandize this faith  
Or this fact connected to the faith  
Obviously  
We are not talking anymore of few denarii  
But of millions of denarii  
But the purpose  
Even if well masked  
Is always the same  
Betray shamelessly  
A faith  
In the hope  
That the accomplices of the summits  
Would be enough powerful  
To absolve any fault  
This consideration  
To remain in the same subject  
Dear spirituals  
Is only a pious illusion  
Removing the "pious"  
Remains the illusion  
Fully responsible  
For whom provoked it  
It is like knotting something  
If it is not well done  
With a well precise purpose  
All these knots  
Always will find you out  
And in that moment  
The time of the truth has arrived  
This type of truth  
It is completely independent  
It does not depend on anybody

It is not possible to influence  
But it always comes at the right moment  
And in the right time  
Sometime it could seem like  
It never comes  
One needs to have Faith a lot of Faith  
It always comes when less expected  
The concept of Spirituality  
The real one  
Is really difficult to see  
Because it is inside of any of us  
Only **GOD** could see if we have it  
Who shows off as being one  
Shows off and external image  
But what is inside?  
During the day he could even show  
Anything  
But in the night  
When he should sleep  
Is he able to sleep peacefully  
Like the humble ones?  
Certainly he will have thoughts  
Of what kind?  
Just thoughts or of torment  
What does merge from deep down of the soul?  
What could possibly torment this being?  
When he is lonely in front of himself  
Does he know his hypocrisy  
His falsity  
He is an impostor!!!  
He shows what does not exist  
Or does he believe to be able to remedy in the end  
When his experience comes to an end  
By belated words of repentance  
He could not repent earlier  
And declare that it is perjury  
To do this it is necessary a lot of courage  
And before the final time

Almost everybody does not have this courage  
They hope on a salvage intervention  
The salvage is done only in the sea  
When there is the danger of drowning  
For sure not on the land.
